0 - No

I am having a hard time scaling an IIoT project because of data interoperability issues.

1 - Yes

0 - No

2

I am writing and maintaining custom scripts to move industrial data to data lakes or BI platforms in the Cloud.

Our data scientists are spending more than half their time finding, massaging, and preparing data for analytics.

5

1 - Yes

0 - No

Our engineering team is backlogged with requests from other departments to get access to machine data—and explain it to them.

1 - Yes

0 - No

6

I am unsure which users inside or outside of our company have access to factory floor data generated by assets, products, processes, and systems.

Results

Score

- 0-1 My data integration practices are healthy.
- 2-4 I would benefit from incorporating an Industrial DataOps approach.
- 5-6 It is critical that I investigate an Industrial DataOps solution.
